b. [REDACTED] equipment [REDACTED] in the unit:

- (1) The only small arm [REDACTED] was the M-1938 carbine without bayonet. [REDACTED] 25X1
- (2) The unit had in its area an estimated 200 152-mm. howitzers, model unknown, tractor drawn, type unknown. There were only 50 tractors in the unit and only a few pieces were used for training and for maneuvers. The remaining pieces were left in two storage sheds. These sheds had three wooden sides and tile roofs. They were approximately 20 x 60 m. The howitzers were placed therein in two rows with about 30 cm. between the hubs.
- (3) With the unit there were approximately 50 M-13 rocket launchers mounted on Studebaker trucks. These stood in an open field and had no assigned personnel. The trainees were utilized to clean these weapons once a week.
- (4) [REDACTED] approximately 50 100-mm. anti-tank guns. Each of these had prime movers, make and type unknown. 25X1
- (5) [REDACTED] approximately 40 AA weapons [REDACTED] believed to be 100-mm. as the bores were about the same diameter as those of the anti-tank guns. Only about one-half of these had prime movers, make and type unknown. 25X1

4. Personnel

[REDACTED] the unit was considerably under strength. [REDACTED] it was at half strength. The rocket launchers had no assigned personnel. The anti-tank unit was the closest to being up to strength as it moved out to summer training in May 1950, leaving very few of its pieces in camp. There were quite a number of other weapons. exact figure unknown. left behind when the regiment moved out. 25X1

1. Comment: [REDACTED] the large number of assigned weapons left a certain room for doubt as to whether or not the unit was a regiment. However, [REDACTED] the figures [REDACTED] were very close. 25X1
